

Products for Military and Prime Contractors

GSA Contract GS-07F-281AA - CAGE Code: 1XW23

ABI Electronics

PCB test equipment (Used by large aerospace contractors for maintenance of military & commercial aircraft, including the F-16 and NATO joint F-35 fleets).

Pico Technology

PC-based vehicle maintenance and diagnosis equipment.

Coltraco Ultrasonics

Leak/Level/Flow detection (Used by the UK Royal Navy and Fire Services).

MSR Data-loggers

(Used by NASA) Miniature loggers for shock/transportation, 3-axis accelerometry, temp/humidity, air pressure, and light.

Cambrionix

USB charging/sync systems (Used by US DoD agencies).

Windfreak RF Modules

Compact RF signal synthesizers.

Sensor Technology

Torque and weight sensors (used in UK for sensing under-slung helicopter loads).

ABI RevEng

Reverse engineering equipment for recreating schematics and layouts of obsolete PCBs for replication.

Ramsey/Select Fabricators/Tekbox

EMI-quiet enclosures (from cell phone pouches to aircraft-sized for EMC investigations and portable anti-espionage SCIF environments).

Spectratronix

Mix-and-match ready-made RF modules to rapidly create any kind of radio system (e.g. MIMO testbed, channel sounders).
