RadGreen

Saelig Announces New Distribution Agreement with RadGreen Ltd.

Fairport, NY. Saelig Company Inc. (Fairport, NY) announces that it has been appointed an authorized distributor for RadGreen Ltd. (Israel) - an environmental health and technology company that specializes in easy-to-deploy, next-generation RF and indoor air quality (IAQ) monitoring solutions for RF labs and corporate and commercial real estate. RadGreen RF monitors sense radiation levels in specific wavelength bands, while their IAQ monitor range checks up to 14 parameters, both monitors provide online or audible alarms when preset thresholds are exceeded. Standalone, unconnected versions are available for connection-sensitive deployments, such as the military and defense.

Building on 10 years of experience, RadGreen RF Monitors provide continuous RF radiation sensing and alerts across various bandwidths and suitable in both indoor and outdoor environments. These RF monitors evaluate the immediate environment and compare it to regulatory or selected limits.

This agreement will make RadGreen's unique RF monitoring solutions available to Saelig's huge customer-base of electronic design engineers, electronics manufacturers, defense contractors, DOD, government, education, and individual engineers.

"We are very pleased to be partnering together with Saelig's technical distribution services, and are confident that our collaboration will be successful," stated Sigalit Mutzafi, RadGreen's CEO and Digital Products Manager. "We know that Saelig's helpful technology and marketing team will be able to offer a competent resource for customers looking for our RF monitoring capabilities. And their existing customer-base is well-suited to our product offerings".

Alan Lowne, Saelig's founder and CEO, commented "RadGreen's products and capabilities represent a welcome addition to our expansive RF test product portfolio. RadGreen offers unique RF monitoring solutions – just the kind of products that we seek to offer our customer-base. This agreement will help us maintain our commitment to providing and supporting the best engineering products available."

For detailed specifications of RadGreen products and capabilities, free technical assistance, or additional information, please contact Saelig 888-7SAELIG, via email: info@saelig.com, or visit www.saelig.com <https://radgreen.com/>

About Saelig Company Inc. Founded in 1988 in Rochester, NY, Saelig is a North American distributor with a growing reputation for finding and sourcing unique, easy-to-use control and instrumentation products and related components. Product lines are continuously added from sources across the globe at highly competitive prices, accompanied by full in-house technical support, exceptional customer service, and fast delivery. For full details of available product lines, please visit www.saelig.com.

About RadGreen Ltd. For the last 10 years RadGreen's mission has been to revolutionize the way businesses approach emissions and operations in corporate, engineering, and commercial spaces. Our cutting-edge equipment does more than just monitor for RF emissions, our plug-and-play setup and device-agnostic integration ensure simplicity and flexibility, adding safety and security while minimizing disruption to business operations, and quickly generating positive ROI.
