# The markets we operate in

Mobile devices are everywhere... but solutions to provision, charge & manage them are not

# We're world leaders in USB solutions

## Speed

The world's **fastest, most reliable and intelligent** USB solutions. **Thunderbolt** technology enables **fast data transfer**, software/hardware **testing** and **high-speed** USB PD charging

\*Up to **7x faster data processing** and **8x faster charging** than other USB hubs on the market

## Reliability

For 15+ years, big tech has relied on us for stable hub performance.

Our latest solution; **world-leading hardware, premium software** functionality and **warranty & dedicated US/UK support 24/5** with a **24-hour SLA** period

## Intelligence

Our latest solutions bring added intelligence to our hubs. Our **Cambrionix Connect** software unlocks the ability to manage your global fleet of hubs from anywhere in the world and unlocks hub-specific features such as **multiport DFU mode**, individual port & hub management

# Testimonials

# Customer testimonials

*"For us quality and reliability are non-negotiable, as our products are being used in critical environments like healthcare, public sector and education. That's why we've trusted Cambrionix for over a decade.*

*Their boards consistently deliver the performance and resilience our charging trolleys and MOD-approved cabinet solutions need to power operations even under demanding field conditions. Cambrionix has been a key partner in helping us design technology our customers can rely on."*

**Stephen Addy**  
Chief Executive Officer  
MultiCharge

*"Cambrionix's expertise in fast, reliable, and intelligent device connectivity solutions plays a critical role in supporting our uniquely complex testing and automation needs across a diverse range of mobile products — including phones, watches, and earbuds.*

*Their high-speed, flexible USB hubs seamlessly integrate with our remote, low-touch back-end systems, enabling us to run broader and deeper test coverage within a single test fixture. This capability empowers our teams to address more edge and corner cases effectively, accelerating development that delivers improved product reliability to the end users.."*

*"The Cambrionix ThunderSync-C10 satisfactorily met the rigorous hardware certification requirements necessary to fly aboard the International Space Station.*

*It outlasted several demanding tests under heavy heat/magnetic loads and proved capable of continuously providing power and data necessary for operation of critical hardware on-orbit.*

*The ThunderSync-C10's capabilities ensure that the International Space Station and its partners will continue to experiment and innovate to ensure mission and program success."*

**Richard McDonald**  
Project Manager,  
Cargo Mission Contract  
Leidos

# Customer testimonials

"At ChargeBox, we've been working with Cambrionix since 2012 to power our charging solutions with their cutting-edge USB hubs. Our partnership led to the development of a USB fast-charge hub in 2015, paving the way for super-fast USB PD charging at Heathrow T2 today.

Thanks to Cambrionix's innovation, our hubs provide exceptional reliability and real-time analytics, delivering the highest sustained usage ever. Their expertise makes them a shining example of British tech success, and we look forward to the next decade of collaboration!"

**Ian Hobson**  
Managing Director  
ChargeBox

"Working with Cambrionix has been a fantastic experience. The product itself is **outstanding, well built, reliable**, and clearly designed to meet a wide range of industrial standards, from schools to enterprise environments and beyond. It fits perfectly into my workflow, making the job smoother and more automated in so many ways.

I can definitely highlight the **level of support, expertise and dedication** of the Cambrionix team. They have a brilliant understanding of the products and a genuine desire to help."

**Marek Bajno**  
Apple Tech Enablement  
Lead Consultant  
Computacenter

"Cambrionix products deliver exactly what they state for. From the moment we received our first ThunderSync3-C10 hubs, we were impressed by the build quality and functionality.

The first day we put hubs to the test, we made the cost money back before lunch and never looked back. Now, we proudly own a vast amount of Cambrionix hubs and evangelize them whenever possible."

**Matt Hefner**  
Vice President of  
Client Services

# NEW – ThunderSync5-C16 PD

The world's fastest, most reliable, most intelligent multiport USB solution

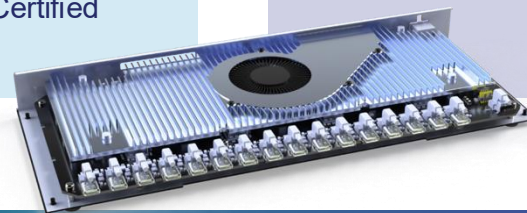

## The fastest multiport hub on the market

- \*Up to 7x faster data processing and 8x faster charging than alternatives
- 25% faster than the ThunderSync3
- Up to 60W per port, with a max output of 285W for rapid charging of devices  
*(e.g. smartphones, tablets, notebooks & VR headsets)*
- Assign PD profiles to specific ports

## Reliable by design

- Dedicated 24/5 US & UK support (UTC), 24hr SLA and 3-year warranty
- Bespoke cooling system and over-current detection guaranteeing stable temperature and operation with heavy use
- No device dropouts due to USB endpoint limitations
- Free lifetime firmware updates and new features
- CE, FCC and UL Certified

## Intelligence at the core

- One-click multi-device DFU mode
- Programmable port LEDs for visual indications
- Unlock organisation-wide hub management, remote and global visibility of new and pre-existing hubs
- Schedule & automate ports, enabling 24/7 operation and power control to manage energy consumption

## Compact & versatile

- Wall/desk/surface mount brackets
- DIN rail compatible
- 1U 19" rackmount conversion kit, neatly contains both hub and PSU
- Our most compact non-intrusive power supply, using latest GaN technology

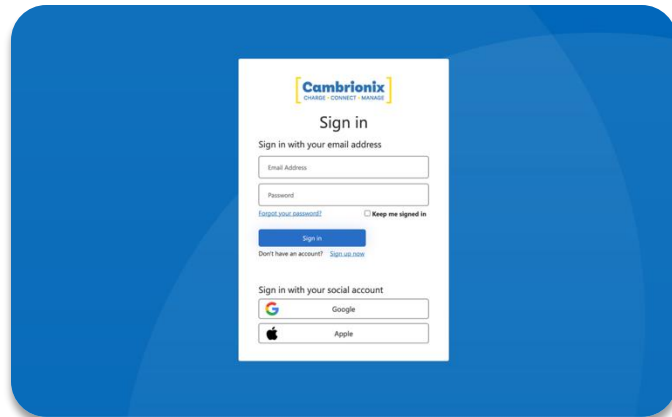

# **NEW** Cambrionix Connect

The next generation of software for device communication

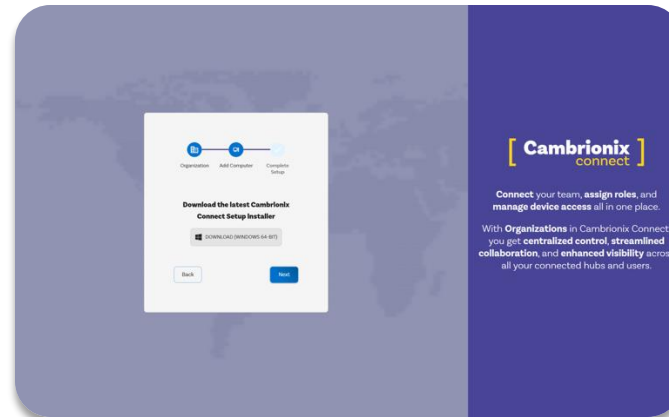

# Access hubs & devices anywhere in the world

Our proprietary cloud-based software platform - rebuilt from the ground up, to support new and future features

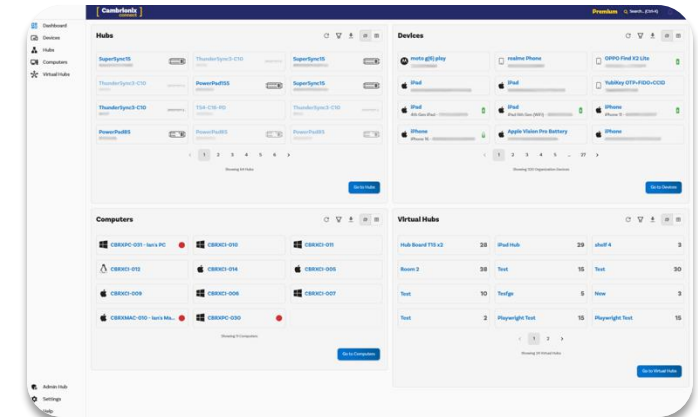

## Sign up and sign in

Sign up and sign in to Cambrionix Connect online and install your API.

## Onboard your fleet

Onboard your entire fleet of Cambrionix hubs and devices for free

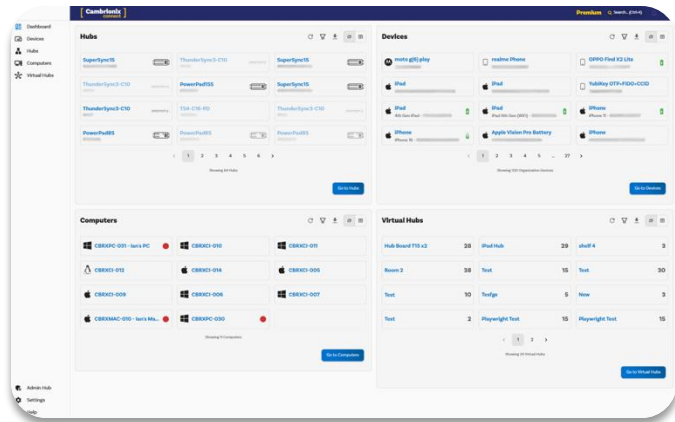

## Manage your hubs and devices

Manage your hubs and devices; remotely update firmware across your entire organization

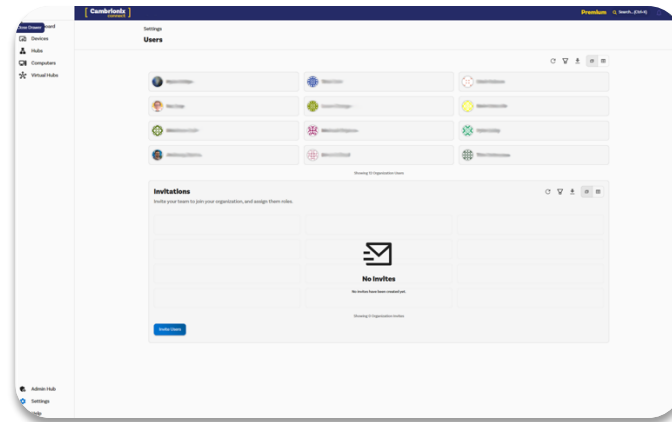

# Connect Standard

Our proprietary cloud-based software platform - rebuilt from the ground up, to support new and future features

## Remote access to hubs & devices

View and manage your entire fleet of host machines, hubs and devices from anywhere in the world with remote access

## User management & monitoring

Invite additional users to collaborate, view devices and manage hub settings. See the last known status of every device and hub

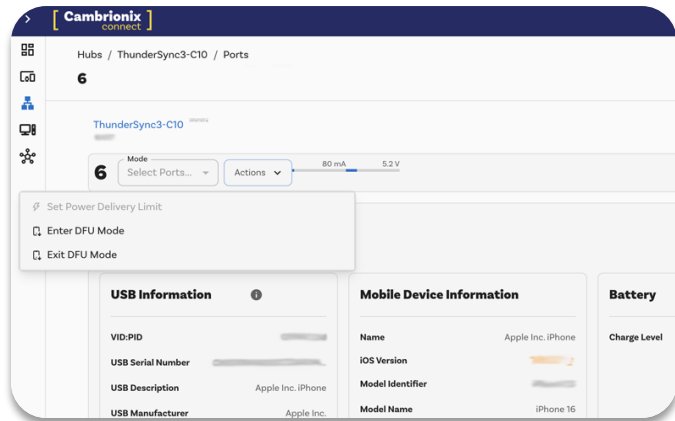

## Detailed device information & custom groups

View detailed device information and personalize your hub and device organization using custom data fields

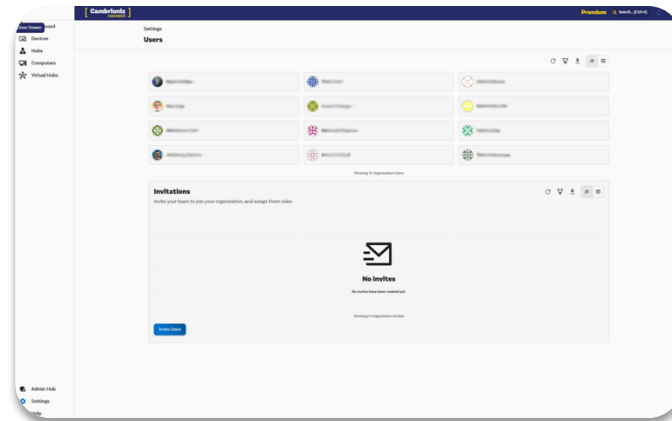

# Connect Premium

Coming soon as part of our ThunderSync5-C16 PD Solution

## Apple Device Firmware Upgrade (DFU) Mode

Supporting Apple Silicon Mac and iOS devices with USB-C ports

## Flexible Power Delivery Management

Choose the maximum power output per port (60W, 45W, 30W, 27W, 15W, 4.5W)

## Schedule port modes and define device charge

Turn ports on/off at specific times, set % charge levels on devices
